

## Breaking the vicious cycle: Finally sleeping through the night – despite dementia

67% of patients with dementia suffer from sleep disturbances affecting both patient and caregivers. Sleep aid medications often become ineffective, and are not a long-term solution.

### The Thevo-Effect

*“As her dementia progressed, my wife simply couldn’t rest anymore at night. I was very concerned. I too was getting far too little sleep and reached the end of my rope. Thanks to the dementia care mattress, ThevoVital, we are back to enjoying our days again.”*

### Documented experience reports:

Two out of three patients with dementia showed a great improvement in their sleep patterns- [www.thevo.info](http://www.thevo.info)

Awarded:

## Improved sleep with the Dementia Mattress

- ✓ Less night time wandering
- ✓ Less napping during the day
- ✓ Less disorientation
- ✓ Decreased need for sleep aid medications
- ✓ Peace of mind for caregivers

The report shows results compiled by the IGAP Institute:

Approximately two out of three persons with dementia showed an

**67%** ✓

Improved sleep behavior

Two thirds of persons affected and caregiving staff recommend ThevoVital!
